

Fire & Explosion

Sdii Global's fire and explosion experts bring technical expertise and decades of forensic engineering experience to analyzing complex incidents. Every investigation follows NFPA 921 and sound engineering principles, resulting in clear, scientifically supported reports with actionable insights. We document all findings with subrogation and litigation in mind, ensuring our opinions withstand legal scrutiny. Attorneys value our thorough preparation, confidence and experience in cross-examination, and our fact-based conclusions, which have been accepted in trials and quasi-judicial proceedings for over 30 years. Our proven track record is why clients trust us.
